Press Release

Strategic Post Processor Development Partnership

January 26, 2011

Cambridge, ON Canada: In-House Solutions Inc. is pleased to announce the signing of a Strategic Post Processor Development Partnership Agreement with Barefoot CNC, Morganton, NC. Under this agreement, In-House Solutions will develop, sell and support Mastercam post processors and Barefoot CNC will become an integral part of the post processor development team. Two long term and reputable Mastercam Resellers join forces to develop superior and reliable post processors along with machine simulation for the Mastercam Reseller network.

Mastercam programmers worldwide can continue to benefit from In-House Solutions' post processors for machines such as Mill-Turn machines (multi-tasking machines), CNC Mills from 2 to 5 Axis including horizontal machines (with probing routines, rotary axis), CNC Lathes such as 2-axis turning to C-axis machining, Wire 2-5 axis, CNC Routers 2-5 axis/Point-2-Point machines (with Multi-Head, Drill Blocks, Aggregates, Pods, Nesting Functions), and 2-5 axis machines such as Waterjets, Lasers, Plasma Cutters, off-line programming of 6-axis Robots and specialty machines.

In-House Solutions' professional post processor development team will work closely with Jimmy Wakeford, President of Barefoot CNC to 'write and field test' post processors for popular CNC machine tools.

eMastercam.com and its Forum will be a focal point for post processor communications and eventually post processor distribution. This will improve communication between post processor developers and Mastercam end users with the intent of simplifying the post processor modification process.

In-House Solutions is proud to add Barefoot CNC as a 'Post Development Partner' with its many years of Mastercam and post processor development expertise.

About In-House Solutions

In-House Solutions Inc. is the Canadian Mastercam Distributor, a Developer of Mastercam Post Processors, and a manufacturer of Mastercam training tutorials and training videos. It is also a North American Distributor of Robotmaster used for Off-line programming of 6-axis Robots. In-House Solutions has been a CAD/CAM solutions provider for 23 years and holds a proven sales track record of performance ranking #2 or #3 worldwide in the Mastercam community. It has accumulated a significant amount of Mastercam and related manufacturing experience.

In-House Solutions is 50 people strong with 7 offices in North America. It provides Mastercam based CAD/CAM solutions to both manufacturers and educational institutions and is extremely service oriented.

About Barefoot CNC

Barefoot CNC is the exclusive Mastercam Reseller for North and South Carolina, a Developer of Mastercam Post Processors and a Developer of VB scripts. Barefoot CNC is a successful CAD/CAM solutions provider with over 15 years of experience. It holds an impressive Mastercam sales and support track record of both growth and performance. Barefoot CNC provides Mastercam based CAD/CAM solutions to manufacturers and is an avid technical supporter of educational institutions.
